

Job Description – Software Trainee/Engineer

Trexo Global | Full-Time | Onsite

About Trexo Global

Trexo Global is committed to building the Future of IP Technology through innovative products. We are committed to delivering an exceptional customer experience every day. We back our colleagues with the support they need to thrive, professionally and personally. Our working model provides excellent flexibility to colleagues while ensuring we preserve the essential aspects of our unique in-person culture. You won't just shape the world of Intellectual Property but will also help the world innovate and build new ideas.

Trexo Global is a start-up unlike any other. We have the culture and energy of an early-stage start-up but are already profitable and therefore do not require external funding. This means our leadership team is in charge of the company's direction and not prone to pressure from outside investors who often bring about radical change related to products, sales, or structure.

Role Details

Designation	Software Trainee/Engineer
Employment Type	Full-Time
Work Mode	Work from Office/Onsite
Location	Sector 142, Noida

Key Responsibilities

- **Application Development & Maintenance**
Design, develop, and maintain scalable, high-performance web applications under guidance from senior engineers.
- **Front-End Development**
Build responsive and user-friendly interfaces using HTML, CSS, JavaScript, and modern libraries / frameworks such as React / Streamlit.
- **Back-End Development**
Develop and maintain backend services using Node.js (Express.js) or Python-based frameworks such as FastAPI.
- **Database Management**
Implement and work with relational and NoSQL databases (PostgreSQL, MongoDB), ensuring data integrity, performance, and basic optimization.
- **API Development & Integration**
Develop and consume RESTful APIs to enable seamless communication between front-end and back-end systems.

- **Testing & Quality Assurance**

Write and maintain unit test cases to ensure reliability, correctness, and quality of delivered software.

- **Performance & Debugging**

Identify, troubleshoot, and fix bugs and performance issues to improve application stability and scalability.

- **Code Quality & Best Practices**

Write clean, maintainable, and efficient code while adhering to established coding standards and review guidelines.

- **Security Awareness**

Follow secure coding practices and assist in implementing security controls to protect applications from vulnerabilities.

- **Documentation**

Maintain clear documentation for code, APIs, and development processes.

- **Cross-Functional Collaboration**

Work closely with designers, product managers, QA, and senior engineers to deliver features aligned with business requirements.

- **Continuous Learning**

Stay updated with emerging technologies, frameworks, and industry trends, applying learnings to ongoing projects.

Qualifications

Education:

- Bachelor's or Master's degree in Computer Science, Information Technology, or a related field.

Experience:

- 0–1 year of experience in Full Stack software development (internships and project experience included).

Technical Skills

- **Programming Languages:** JavaScript (Node.js), Python
- **Front-End Frameworks:** React (Angular or Vue.js is a plus)
- **Back-End Frameworks:** Express.js, Django, or FastAPI
- **Databases:** PostgreSQL, MongoDB
- **Cloud Platforms:** Basic familiarity with AWS services

- **APIs:** RESTful API development and integration
- **Web Technologies:** HTML, CSS, JavaScript
- **Version Control:** Git (branching, pull requests)
- **Development Methodology:** Agile / SCRUM
- **Software Architecture:** Basic understanding of system design principles and design patterns

Soft Skills

- Strong problem-solving skills and attention to detail
- Clear communication and teamwork abilities
- Ability to work independently with guidance
- Quick learner with adaptability to new technologies
- Comfortable working in a fast-paced, collaborative environment
- Good organizational and time management skills
